DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Adair (US 5,311,858) in view of Wilk (US 5,232,440).

Adair discloses a medical instrument having a tube 24 including a plurality of slots 36 (figs 3 and 9) defining a retrieval basket 34 capable of expansion and contraction to surrounding contact, capture and retrieve at least one particle. However, Adair is moot to the kind of material that the tube and the slots are made of, and that the tube and slots are a single piece construction where the slots are monolithic to the tube.

Wilk teaches a tubular member 12 (figs 1-2) having slits forming a basket being monolithic to the tubular member. Given the teachings, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Adair's slots and tube with Wilk's monolithic slits and tubular member. Doing so would have improved the configuration of the basket for capturing and retracting particles from an artery. Also, the selection of a memory metal material in the art of endeavor has been rendered as an obvious design choice, since the selection of a known material based on its suitability for its intended use supported a *prima facie* obviousness determination in *Sinclair & Carroll Co. v. Interchemical Corp.*, 325 U.S. 327, 65 USPQ 297 (1945). Furthermore, the use of a one-piece construction instead of the structure disclosed in the prior art would have been merely a matter of obvious engineering choice. In re Larson, 340 F.2d 965, 968, 144 USPQ 23 (CCPA 1952).

Allowable Subject Matter

3. Claim 7 is allowable over the prior art of record.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Weinrib, and Herzberg.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
